Industry Perspective

- **Industry must be fully aligned with Navy MIW Roadmap**
 - Innovative Solutions
 - Emphasis on Performance
 - Affordability
- **Stability in the Roadmap facilitates optimum industry contribution**
 - Yields best use of resources
 - Maximizes benefit from technology investment

Industrial Base

- Optimum progress in MIW is dependent upon a stable industrial base
- Large Contractors need to nurture world-class supply chain
 - Strengthen every link in the customer value chain
 - Value-added coordination in the design, execution and management
 - Encourage innovative small businesses
 - Leverage Mentor-Protégé relationships
- Teaming can yield superior MIW solutions
 - Combines best industry ideas, technology and practices
- Biggest Issue Faced: Getting enough talented people.

Make LCS Mission Module Plan a Winner

- Industry must Align MIW with Navy Open Architecture Standards
- MIW Modules must be Rugged, Readily Transportable and support Rapid Reconfiguration
- MIW Modules must deliver high Operational Availability and instill user confidence in performance
- Place Strong emphasis on affordability and supportability
- Establish a Well-Conceived Spiral Development Plan
- Deliver New MIW Mission Modules on Schedule
- Provide Mine Warfare Mission Module Capability that is Independent of LCS Ship Schedules and Issues: Provide the capability independent of the platform.
